## SUMMARY

---

Backend software engineer with 6 years of experience building distributed systems and developer tooling. Focused on reliability, observability, and clean API design.

## EXPERIENCE

---

**Senior Backend Engineer, Northwind Logistics** Mar 2022 - Present

- Led migration of the shipment-tracking service from a monolith to event-driven microservices, reducing p99 latency by 40%.
- Owns the team's on-call rotation and incident response process.

**Software Engineer, Clearwater Analytics** Jul 2019 - Feb 2022

- Built internal data pipeline tooling used by 30+ analysts daily.
- Reduced report generation time from 4 hours to 12 minutes via query optimization.

## EDUCATION

---

**B.S. in Computer Science, University of Washington** 2015 - 2019

## SKILLS

---

Python, Go, PostgreSQL, Kafka, Docker, Kubernetes, AWS, gRPC, Redis, Terraform
